

EU Framework 7 Research Collaboration

Knowledge lies at the heart of the European Union's Lisbon Strategy to become the "most dynamic competitive knowledge-based economy in the world". The 'knowledge triangle' - research, education and innovation - is a core factor in European efforts to meet the ambitious Lisbon goals. Numerous programmes, initiatives and support measures are carried out at EU level in support of knowledge. The Framework 7 Programme (FP7) bundles all research-related EU initiatives together under a common roof.

C-Tech Innovation has a long history as a participant in funded research projects, as a project leader, coordinator and partner. We have contributed to dozens of Framework 5 and 6 research projects as well as other ongoing innovation programmes, and we have access to a range of networks which can provide partners and additional support to projects undertaken.

As well as participating directly in Framework projects our success allows us to provide mentoring support and proposal advice to those thinking of submitting a bid themselves.

FP7 Project Interest

We have specific interest in various FP7 'Cooperation' programme themes, supporting all types of trans-national research activity, and aims to promote leadership in key technological areas.

Our prime interests are in:

- Theme 1 - Healthcare
- Theme 2 - Food
- Theme 4 - NMP (Nano Materials Processes)
- Theme 5 - Energy
- Theme 6 - Environment
- Theme 9 - Security

We also have interest in the

- Ideas Programme

Innovation Management

C-Tech Innovation are experts in practical implementation of Innovation. We can help you to maximise business opportunities through a varied and wide-ranging and hands-on service

- Contract research
- Grant assisted research
- Process innovation and scale-up
- New product development
- Prototyping
- Project management
- Knowledge transfer
- Technical due diligence
- Intellectual Property exploitation
- Technology transfer
